

# Swimming Pool Hurricane Preparation

In the event there is a hurricane

1. Move all potted plants, lawn furniture, and other loose items away from the pool area.
2. Triple shock, add algaecide, and add chlorine tablets in a floater to your pool.
3. Tighten all chemical lids good and store in an elevated area.
4. Filter your pool until a few hours before evacuation.
5. Drain pool to the bottom of your skimmer, or right below it.
6. Turn off pool equipment at the breaker (do not turn back on until all water resides and the equipment is completely dried out)
7. After storm passes contact Cryer Pools for clean up instructions or visit us at [www.cryerpools.com](http://www.cryerpools.com)
